David Harvey Session on Sirohi and Companies – what I call Capital and Culture

By David Harvey

I. Inventions and Lifestyle First – just an Idealist Company – Sirohi's Model Company

In fact Sirohi went with a abstract idea of capital – he decided to produce his inventions amounting to a creative artistic process even with film production which he edits into the highest Hollywood cinema sitting in his Fundacion which then is for anyone to live with in the world – and produces also Brecht, and forms of art, art curation and even architectural Franciscanism which then becomes also a political news and TVE which is all his inventions and creates a lifestyle of perfect health and even conversations on psychoanalysis and free love as in fact his choice of Latin Quarters life.

II. Companies become Capital – Joining Capitals and producing a financial cycle – with Sirohi as leading capital in America – with an additional practical humanism for Black power in fact by axiom in fact each time – Living with Cornel West around.

In fact companies become capital – he keeps judging its statistic and that is capital which joins historically and becomes a financial cycle in America as secured and perfect as in fact he aids the Operatic state more and more – and even gives an Althusserian economics to follow the world. He thinks he is too rich at times, or too Jewish, or in fact important for that cycle – but one must add, that in fact that has a long history he calls Genoa first which becomes the general metaphor.

III. Commerce on Culture – A Sirohian Idea for again it seems New York mainly

In fact commerce and billing on some architecture, arcades, shops, deparment stores, university ideas like a interdisciplinary idea of literarture, Spanish language and in fact French mixed with modelling criticism becomes a simple idea of how he helps Berkeley. Apart from his love for literature and jazz criticism.

All of this is his simple work called 'Capital' it calls the whole thing a Jewish idea of investments, banking all that he aids in Jewish tips.
